

Audits

The audits are conducted as follows:

- 1) Department Self Audits
- 2) Internal Association Audit and Review
- 3) Site Visit Audits performed by Association employees
- 4) Site Visit Audits performed by an Association employed third party auditor

To aid fire departments in audit compliance, the Association recommends that the department comply with form filing requirements, conduct self-assessments per form 206 and 207, and retain adequate backup documentation. Site audits will review and utilize these same forms for verification of funds use. To prepare for a site audit, please click [HERE](#) to download the Association's pre-audit information. Recourse or action as a result of the audit are classified by a grading system that may be downloaded [HERE](#) for explanation. All of this information is provided to a fire department prior to the Association conducting a one percent funds audit.

If you have questions concerning audits, please contact the SCSFA One Percent Coordinator.
